

**Protection and Prevention Service**

**Asiago and Cima Ekar (VI) Observatories**  
**“Security Regulations and Emergency Plan”**

Last updated on February 10<sup>th</sup>, 2012

1. During the nights, **AT LEAST TWO PEOPLE** should always be present at Cima Ekar.
2. The use of the **“EMERGENCY CALL EQUIPMENT” IS MANDATORY**. This allows an immediate help call in the **CASE OF EMERGENCY**. (\*)

The device, **LOCATED IN THE CONTROL-ROOM** is composed by a land-line telephone with a speaker and an “emergency call equipment”, with an action radius of 50 metres from the base.

On the “e.c.e.”, you will find a **RED BUTTON** that, if pressed, activates the following commands:

**a)** If pressed **FOR MORE THAN 1 SECOND** it will activate a blinking light on the telephone, associated with a strong beeping noise that will last for about 15 seconds. At the same time, the “e.c.e.” will dial, in speaker mode, the numbers on the memory and an emergency message will be announced continuously for 60 seconds.

If during this time the called person answers and accepts the emergency call, pressing the 0 button will activate the conversation in speaker mode for 3 minutes. To increase duration of the call, the called person should dial 1 followed by 2.

In case of activation of the alarm by mistake, this can be interrupted within 15 seconds, by pressing the red button of the “e.c.e.” **FOR MORE THAN 4 SECONDS**.

All the abovementioned functions can also be made from the **S.O.S. BOTTON ON THE TELEPHONE**.

**b)** In the case there is no reply from the first dialled number, the systems will contact the following number, and so on.

3. If there are technical problems that are not easily solvable **PLEASE DO NOT RISK YOUR LIFE**.

4.  **“First Aids”**: if you need there are “first aid kits” in the control-room and in the dome floor.

**Notes:**

- (\*) Activating a series of phone calls in the following order:  
1. **Martorana** + 2. **Munari** + 3. **Benetti** + 4. **Turatto**
